

GLUE REMOVER

FOR MOST TYPES OF GLUE

LOCTITE GLUE REMOVER is suitable for the removal of super glue and many other glues from badly bonded objects, stained surfaces, fabrics and accidentally bonded fingers. It can also remove traces of sticky labels, inks and permanent marker stains. The non-drip formula is suitable for application to vertical surfaces.

HOW TO USE:

STAINED SURFACES – STAINED CLOTHES – BADLY BONDED OBJECTS

Screw nozzle onto tube. Unscrew cap. Lightly cover the stained or badly bonded area with Loctite Glue Remover. After use, wipe nozzle with a tissue and replace cap. Place a folded tissue on top of the treated area. For fabric stains, place folded tissues on both sides. Leave for several hours or preferably overnight. Remove and discard the tissue containing the glue residue. Wipe area clean with fresh tissue. Finally rinse or wash the treated area with water and allow to dry. Repeat the above process for heavy or difficult stains. Treated fabrics may require several washes to remove all traces of stains.

BONDED FINGERS: Apply Loctite Glue Remover to bonded area. Allow several minutes for the glue to soften. Gently peel bonded area apart allowing the product to penetrate and break down the bond. Do not attempt to force skin apart by pulling, use a blunt edge, eg. teaspoon. After separating, rinse the area with soapy water. Avoid prolonged skin contact.

LIMITATIONS: Please test on a hidden area before use if in any doubt. Do not use on painted or varnished surfaces, not suitable for use on hard plastics, eg. ABS.

WARNING: READ INSTRUCTIONS CAREFULLY. HOLD AWAY FROM THE BODY DURING USE. USE IN A WELL VENTILATED AREA.

LOCTITE Household Adhesives.

Irritating to eyes. Keep out of the reach of children. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of soap and water. If swallowed seek
